

Spiritual

By placing our planet at the centre of all we do, pupils begin to develop an appreciation and enjoyment for both the world and our local environment.

By learning about aspects of human geography, pupils can be motivated to explore different cultures, careers and lifestyles. Whilst acknowledging the role they have to play in caring for the environment.

Moral

Through the exploration of geographical topics across the curriculum, exploration of inequalities found across the globe are highlighted which encourages a sense of empathy towards others.

World issues are explored through fun decision-making activities, where children understand the views held by society, and by various groups within society, and will develop their own attitudes and values in relation to these.

Geography

Social

Our geography lessons strengthen pupils social and problem solving skills as classes work in groups regularly in order to share their knowledge to develop their mapping reading, communication findings and fieldwork.

Cultural

Children regularly take part in studies of the local area and a contrasting environment. By doing this, children will become more aware of the culture that they are growing up in, alongside gaining a knowledge and respect of other faiths, cultures and beliefs.
