

Spiritual

- Allowing students to show their delight and curiosity in designing and creating their own products.
- Making links between their learning in other curriculum areas with themes within D&T.
- Looking at the use of D&T for special festivals and occasions.
- Exploration of the architecture of spiritual locations.

Moral

- Being aware of sustainability and the effect of making products on the environment.
- Considering costs of making products and efforts to maintain affordability.
- Raising questions about the effect of technological change on human life and the world around them.

SMSC at St Breock

Design & Technology

Social

- Identifying problems that individuals might face in the real world and solving these problems by creating a practical solution.
- Appreciating how D&T is used in different ways and for different occasions e.g. food product made for a festival or celebration.

Cultural

- Considering cultural influences on design.
- Studying designers from all over the world.
- Incorporating D&T from different nationalities and cultures, eg, traditional cuisine from different cultures.
